

Structured Matrix Based Methods for Approximate Polynomial Gcd

Filesize: 8.73 MB

Reviews

Very beneficial to all category of folks. I really could comprehended every little thing out of this created e publication. I found out this book from my dad and i encouraged this ebook to discover.
(Maia O'Hara)

STRUCTURED MATRIX BASED METHODS FOR APPROXIMATE POLYNOMIAL GCD

Edizioni Della Normale. Paperback. Book Condition: New. Paperback. 250 pages. Dimensions: 9.4in. x 5.8in. x 0.6in. Defining and computing a greatest common divisor of two polynomials with inexact coefficients is a classical problem in symbolic-numeric computation. The first part of this book reviews the main results that have been proposed so far in the literature. As usual with polynomial computations, the polynomial GCD problem can be expressed in matrix form: the second part of the book focuses on this point of view and analyses the structure of the relevant matrices, such as Toeplitz, Toeplitz-block and displacement structures. New algorithms for the computation of approximate polynomial GCD are presented, along with extensive numerical tests. The use of matrix structure allows, in particular, to lower the asymptotic computational cost from cubic to quadratic order with respect to polynomial degree. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
