

# A Reinforcement Learning Network based Novel Adaptive Routing Algorithm for Wireless Ad-Hoc Network

Filesize: 5.68 MB

## ***Reviews***

*This ebook will not be simple to start on reading but very fun to learn. It generally is not going to expense too much. I am very happy to explain how this is the finest book i have read in my very own existence and can be he finest pdf for at any time.*

To read **A Reinforcement Learning Network based Novel Adaptive Routing Algorithm for Wireless Ad-Hoc Network** eBook, you should access the button beneath and save the file or have access to additional information which are highly relevant to **A REINFORCEMENT LEARNING NETWORK BASED NOVEL ADAPTIVE ROUTING ALGORITHM FOR WIRELESS AD-HOC NETWORK** ebook.

GRIN Verlag GmbH Jan 2015, 2015. Taschenbuch. Book Condition: Neu. 210x148x1 mm. This item is printed on demand - Print on Demand Neuware - Document from the year 2014 in the subject Computer Science - Technical Computer Science, , language: English, abstract: A Wireless network is a collection of autonomous mobile nodes that communicate with each other over wireless links without any fixed infrastructure. It is a method by which homes, telecommunications networks and enterprise installations avoid the costly process of introducing cables into a building, or as a connection between various equipment locations. A routing protocol is taking a vital role in the modern Wireless Network. Mobile ad hoc network (MANET) is an autonomous system of mobile nodes connected by wireless links. Each node operates not only as an end system, but also as a router to forward packets. The nodes are free to move about and a network. A routing protocol which is responsible to determine how nodes communicate with each other and forward the packets through the optimal path to travel from a source node to a destination node. The purpose of paper is to contribute the study and comparison of routing protocols performance in MANET 12 pp. Englisch.
